WORK EXPERIENCE

Angular | Java Spring Boot | ReactJS | Python | SQL

International Business Machines (IBM), Client: IBM (North America & Europe)

Mar 2022 – Present

Lead software engineer, India

- Partner Certificate Management Platform – Led the design and development of a secure, invite-only platform serving 1000+ enterprise trading partners, automating certificate lifecycle management, improving partner self-service, and delivering **~\$700K in annual cost savings**.
- Unified DataStax Dashboard – Architected a centralized dashboard for DataStax Data APIs, streamlining document discovery and CRUD workflows, reducing developer effort by **70–90%**, accelerating data retrieval by **5x**, and saving **80–120 engineering hours per month**.
- UI Performance Optimization – Modernized the application using lazy loading, on-demand module loading, and client-side caching, reducing page load time by **75%** and improving application responsiveness.
- Reusable Application Architecture – Designed a shared Angular architecture with reusable components and services across four related features, increasing developer productivity by **70%** while reducing duplicate code by **81%**.
- Feature Flag Framework – Developed a reusable feature flag framework that standardized feature rollout, reducing implementation effort by **95%** per feature flag while improving release flexibility and maintainability.
- Design System Migration – Engineered a dual-design-system framework supporting Neutrino and Carbon Design Systems, enabling phased migration while maintaining uninterrupted feature delivery.

TATA Consultancy Services (TCS), Client: Rolls-Royce (Germany)

Nov 2020 – Mar 2022

Software engineer, India

- Project Monitoring Dashboard – Developed a real-time Angular, Python Flask, and SQL-based dashboard to track project execution metrics, reducing insight generation time by **32%** and improving stakeholder visibility.
- Flight Analytics Dashboard – Built interactive aviation data visualizations for Rolls-Royce flight operations, enabling data-driven analysis and contributing to **15%** improvement in route planning efficiency.
- Engine Data Analytics Dashboard – Developed an interactive dashboard for engine and aircraft data analysis, reducing reporting turnaround time by **35%** and improving data accuracy by **20%**.

SKILLS

Programming Languages	: Java, Python, JavaScript, TypeScript, SQL, C
Frontend Engineering	: Angular, ReactJS, HTML5, CSS3, Component-Based Architecture, Design Systems, Responsive UI Development
Backend & API Engineering	: Java Spring Boot, Microservices, Express.js, REST APIs, Python (Flask, Django), API Design, Service-Oriented Architecture
Software Architecture & Engineering Practices	: Object-Oriented Design, Data Structures & Algorithms, Design Patterns, System Design, Reusable Component Architecture, Feature Flag Architecture, Performance Optimization, Scalable Application Design
Databases & Data Management	: MySQL, PostgreSQL, Couchbase, DataStax, SQL Optimization, Database Design, Query Performance Tuning
Testing & Quality Engineering	: JUnit, Jasmine, Jest, Cypress, PyTest, ESLint, Pylint, Unit Testing, Integration Testing, End-to-End Testing
DevOps & Cloud Engineering	: Git, Jenkins, Docker, Kubernetes, Azure DevOps, CI/CD Pipelines, Release Automation, Agile Development

AWARDS & ACHIEVEMENTS

- **Outstanding Technical Achievement Award – IBM:** Recognized for delivering impactful engineering improvements and process optimizations that enhanced development efficiency and product delivery. [2023]
- **Star Team Award – Tata Consultancy Services:** Awarded for exceptional contributions to the Rolls-Royce aviation analytics platform and successful delivery of business-critical solutions. [2022]
- **1st Place – GMOCS Hackathon, MITS College, India (2019):** Secured first place by developing an innovative solution in a competitive engineering hackathon. [2019]

PROJECTS

Unified DataStax Dashboard | ReactJS, TypeScript, Express.js, DataStax Data APIs, REST APIs

Developed a full-stack developer productivity platform for DataStax Data APIs, consolidating secure connections, document exploration, filtering, pagination, and CRUD workflows into a unified interface, improving developer productivity by **70–90%**.

IBM Sterling B2B Integration SaaS Configuration Hub | Java Spring Boot, Angular, SQL

Developed a self-service tool enabling 1500+ companies to independently configure deployment settings (Maps, Code Lists, Connections, PGP Keys, SSL Certificates), reducing support intervention by 60% and configuration time by 25%.

EDUCATION

Jawaharlal Nehru Technological University Anantapur, AP, INDIA

Jun 2016 – Jul 2020

Bachelor of Technology in Computer Science and Engineering | CGPA: 8.6/10
